

ET712 - Assignment 10

Create a JavaScript file (link it to an HTML file), and write JavaScript code for **either Task A or Task B**; Try to publish your webpage through Github.

A.

Create 'roll a dice' mini game application.

The application has 2 buttons for 2 players. Clicking on the each button will show the current dice number (random generated dice number) and the sum of the dice numbers each player has rolled.

Game rule: two players can click their own button once each time, and whoever first gets the sum of the dice numbers ≥ 16 win the game.

If the player win the game, a message such as "Congrats, you win the game" or a winner image should show.

Layout, color and images are upon your own preference.

B.

Create a simple Weather API application:

Your application can show the current weather of New York City and Los Angeles.

You can choose your preferred layout, color and images for your app.

Demo App:
